LH3M
LUNAR HELIUM-3 MINING

MAY NEWSLETTER

To Make Earth Green, We Go to the Moon.

PATH TO THE MOON

SERIES A IS LIVE!

Series A funding advances our proprietary helium-3 technologies, expanding the world's largest helium-3 mining patent portfolio*. This growing IP position should allow us to be the leader in the future helium-3 supply chain supporting a potential $17 trillion fuel market for quantum computing and fusion energy within a broader fusion industry projected by Bloomberg to reach $40 trillion. Request access to our Series A presentation and virtual data room here.

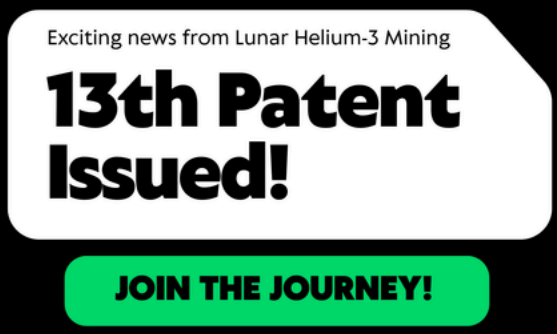
IP MOMENTUM — 13TH PATENT

Recently secured its 13th issued patent, further strengthening LH3M's helium-3 intellectual property portfolio. Its first issued China patent expands the company's growing global position in scalable helium-3 extraction and lunar operations. Read the full article to learn more. CLICK HERE >



TECH & SPACE LEADERS SHOW PODCAST

LH3M's CEO, Chris Salvino joined the Tech and Space Leaders Show for a discussion on lunar Helium-3 mining, truly green fusion energy, quantum computing, and the future of space resources. Watch the insightful conversation on the technologies shaping the future of energy and space exploration. CLICK HERE >

Patent portfolio comparisons are based on publicly available information and may not reflect all issued, pending, or unpublished filings.
